

Maplewood Carpentry Off-Site Instruction

Understanding and Identifying Common Local Lumber Species

1. Visit the Ohio Division of Forestry Webpage at www.forestry.ohiodnr.gov/trees
2. From the index of "Ohio Trees" select 5 trees and read about their species from the information provided from ODNR.
3. You will need to physically find one of the trees above and take a picture of it and you together, or a selfie with you and one of its leaves.

You will email me at georgerte@mwood.cc the following.

The names of the five trees you selected along with one characteristic of each.

As well as the picture of you and one of the five trees, and the location of where that tree is located.
