Chapter 13, Lesson 1

State Sales Tax

(EXAMPLE) Find the total price if you buy a watch at \$30.00 with 6% sales tax.

<p>Step 1</p> <p>\$30.00 original price</p> <p>x .06 rate of tax</p> <p>\$1.8000 tax ∴ \$1.80</p>	<p>Step 2</p> <p>\$30.00 original price</p> <p>+ \$1.80 tax</p> <hr style="width: 50%; margin-left: 0;"/> <p>\$31.80 total price</p>
---------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------

Directions Find the total price for these items. Remember that you always round up to the next cent for tax.
