

Wilfong-Senior Lab-Off-Site Learning Packet Day 7- Infant Programs' Curriculum

You have already read the article provided and mentally picture what a high-quality infant classroom would look like.

Next, use your knowledge of infant development along with the information from this article to create a weekly "lesson plan" for an infant classroom. Your theme will be "Spring". Only understandable titles with short explanations are needed for each activity. Make sure I can know from your titles and descriptions that the plans are age appropriate and safe for infants. Each box for every day should be filled in. Keep in mind the following criteria....

Ages- 6 weeks to 12 months

Development levels- newborns through beginning walkers

2 teachers in your classroom with 10 babies

I have included a sample daily schedule to assist you in picturing the classroom events. Remember, infants do not have an attention span or developmental levels that our preschoolers demonstrate each day. A big part of their daily schedules is caring for their basic needs. (IE: bottle feedings, diaper changing, etc.)

(30 points)
