

College Credit Plus (CCP)

College Credit Plus is an opportunity for students to earn college credits while still in high school. Qualifying students can earn up to 30 credits in one school year. Maplewood Career Center students who participate in the College Credit Plus program will need to arrange their CCP schedule around their lab and related academic classes.

Students who are interested in participating in the CCP program must complete and submit the intent form to their Maplewood Career Center counselor prior to April 1, annually. The intent forms are available in the Maplewood Career Center Student Services office.
